PROFESSIONAL SUMMARY

Software Developer and QA Engineer with hands-on experience building web and mobile applications, complemented by practical experience in manual testing, API testing, and test automation using Playwright, Selenium, and Postman. Through developing and testing real-world applications, I have gained a solid understanding of the software development lifecycle, and quality assurance practices. I am eager to continue growing as a QA Engineer while contributing to delivery of reliable and user-friendly software.

TECHNICAL SKILLS

- Testing: Manual, Functional, Regression, Smoke, Exploratory, Integration, API Testing
- Automation: Playwright (TypeScript), Selenium (Python)
- API & QA Tools: Postman, REST API, JSON, Git, GitHub, Notion
- Programming: Flutter, Laravel, PHP, TypeScript, Python
- Databases: MySQL, PostgreSQL, Firebase
- Methodologies: Agile (Basic), Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC)

WORK EXPERIENCE

Assistant, Computer Science Department (Part Time) *Nov 2025 – Present*

Life University *Sihanouk Ville, Cambodia*

- Designed and executed manual test cases for authentication, attendance, reporting, and academic features.
- Performed functional, regression, exploratory, and API testing.
- Built Playwright end-to-end automation for the Life Football Club website.
- Identified, documented, and verified software defects.
- Developed and maintained Laravel-based university systems.

Flutter Web Developer (Contract) *Dec 2024 – Jan 2025*

Software Factory *Seoul, South Korea*

- Developed a Flutter Web smart interview application.
- Integrated voice recording, speech-to-text, and EmailJS.
- Conducted functional testing and resolved UI and workflow issues.

PROJECTS

Life Football Club Website

Laravel, Playwright, MySQL

- Developed a responsive football club website using Laravel.
- Designed and executed manual test cases covering navigation, authentication, and content management.
- Built Playwright automated end-to-end test scripts for regression testing.
- Identified and resolved UI and functional defects before deployment.

Life University Attendance Management System

Laravel, Flutter, MySQL, Postman

- Developed a digital attendance management system for university staff and students.
- Performed functional, regression, and exploratory testing on attendance, authentication, and reporting modules.
- Validated REST APIs using Postman.
- Verified bug fixes and collaborated on improving system reliability.

Life University E-Learning System

Laravel, MySQL

- Developed features for online learning and course management.
- Executed manual testing to validate student enrollment, authentication, and learning workflows.
- Performed regression testing after feature enhancements.
- Reported and verified defects to improve software quality.

Smart Interview Website

Flutter, EmailJs, Firebase

- Developed an AI-assisted interview web application using Flutter Web.
- Implemented voice recording and speech-to-text conversion for candidate responses.
- Integrated EmailJS to automatically generate and send formatted interview reports.
- Performed functional testing to validate voice recording, email generation, and user workflows.
- Fixed UI and workflow issues to improve application reliability and user experience.

EDUCATION

Bachelor of Computer Science *2023 - 2026*

Life University

CERTIFICATIONS

- Python for Everybody
- Dart Programming
- Application Development I
- Advanced Application Development
- Cloud Storage Firebase
- Fundamentals of Java
- International Smart Competition 2024

VOLUNTEER EXPERIENCE

- Volunteer Liaison Officer – SEA Games Cambodia 2023
- Research & Development Center Member – Life University

LANGUAGES & CORE COMPETENCIES

Language: Khmer (Native) | English (Professional Working Proficiency)

Competencies: Analytical Problem Solving | Team Collaboration & Communication | Adaptability in Fast-Paced Environments | Project Coordination & Task Management | Continuous Learning Mindset
